

THE BREATHE COLLECTION

We show families how to find sanctuary in homes that breathe

By engaging one of Australia's leaders in sustainable housing you can be assured of thoughtful sustainable design, high level of inclusions and specialist craftsmanship, with the added incentive of bridging the gap between traditional 'project' home construction and bespoke architectural homes. Our homes have an exceptional level of inclusions and finishes as a base standard that you will find on the market, all with thermal performance and maximum energy efficiency of your home in mind.

Discover the Breathe Series

Make yourself at home with the Breathe, A sustainably smart range of homes that welcomes the seasons into your living area with an abundance of natural light and graceful natural breezes at every opportunity. The modern angled roof lines, combination of on trend light weight cladding finishes, flowing green upon green gardens, hardwood timber arbours will greet you at hello. Flowing and passive orientated open plan internal and external living and entertaining spaces and timber decked breezeways blurring the threshold of internal and external further showcases why modern efficiency and functionality of the Breathe range should be a priority for all. When family time or you time beckons, the single depth open plan kitchen, dining, living and entertaining area has been selflessly designed to follow life's natural progression from preparing meals, eating around the dinner table to relaxing on the lounge or by the glistening pool. With the Breathe range you and your family, no matter young or mature can embrace a holistic lifestyle upgrade with resort style living.
