

# THE PACIFIC COLLECTION

*We show families how to find sanctuary in homes that breathe*

By engaging one of Australia's leaders in sustainable housing you can be assured of thoughtful sustainable design, high level of inclusions and specialist craftsmanship, with the added incentive of bridging the gap between traditional 'project' home construction and bespoke architectural homes. Our homes have an exceptional level of inclusions and finishes as a base standard that you will find on the market, all with thermal performance and maximum energy efficiency of your home in mind.

## *Discover the Pacific Series*

A range of homes stemming from the roots of Pacific Islander bungalows and traditional Queensland construction, standing as an architectural platform built with a mix of natural materials, simple and rustic design features, sustainable living & strong connections to its flawless beachside setting. Designed for the sub tropical climate, effortless weatherboard cladding, pitched VJ lined ceilings, rustic timber beams, grassed permeable driveway, polished concrete floors, colonial window detailing, floating mezzanine level or quirky IT nook, feature timber shelving intricate timber pergola, chunky round timber posts, covered north facing deck and expansive wrap around verandah, plenty of room for the hammock between the palm trees to just drift away. These are just some of the luxuries the Pacific range has to offer creating a clear synergy between all the elements that offers a truly captivating, liveable and quirky home. Designed around unique combination of privacy and family sharing, the Pacific range offers every family member and friends a place to relax, unwind and enjoy each other company.
