

DISCOVER THE OSPREY

The Osprey is in a league of it's own when it comes to sustainable design and green building practices. Thoughtful planning was involved with consideration for orientation, ventilation and thermal mass to achieve 8.5 star rated energy efficiency home which was built to promote the perks of environmentally responsible living. Immaculately presented this amazing home that defines easy living at its best is light filled and inviting from the moment you step through the front door. This ultra-modern blueprint and simplistic design boasts large bedrooms, spacious bathrooms, an uber functional media / rumpus room along with high raked ceilings and a wonderful open plan design. Operable glass louvres directly link the pool to the living and kitchen area and the floor level glazing makes it appear as if the pool is part of the interior space. Internal Louvres allow further cross flow ventilation between service and living quarters and provides zoning options for these areas. The cool Slick concrete floors with seeded white quartz is highly polished and is offset by raw timber accents and VJ lined bench seats and shelving that pays homage to the coastal lifestyle. The Osprey is the ultimate symmetry of function and sustainability but most importantly it achieves an affordable and obtainable design outcome with a high level of finishes and a positive environmental impact.

Other Design Options

At Eco Essence Homes we understand that you may want to tailor your home to suit your needs with optional Eco Essence Homes extras or custom design requirements.

Build with Comfort
