

## DISCOVER THE SUMMIT

The Summit has been designed with relaxation in mind. Open Plan Living and optimised architectural flow gives occupants the ability to move freely and fluidly between spaces. Generous Glazing surrounds the home on the ground level enabling an abundance of natural light and fresh air to infiltrate the home and frames the manicured gardens from every angle. Multiple and various functional windows and doors are prominent design features throughout the home from louvres in the stair void to the bi-fold windows above the day bed or the large corner stacked sliding doors in the living area. The home is anchored around multiple living spaces and the layout is deliberately designed to facilitate a harmonious transition and strong connection to the outdoors offering family members a range of desirable outdoor living options. External timber decks wrap the living areas creating a terrace that spans to the swimming pool and yard. The facade consists of unique blend of materials and finishes that is unique in appearance. A Custom rendered column and ornamental powder coated aluminium screens at the entrance softens the appearance of the two-story home where you are welcomed in via the unusual and oversized pivot door that opens to a grand entrance void with clear visibility down the corridor through to the back yard. The Summit is a Correlation between progressive sustainable design and comfort where you can recline on the daybed backed by tropical greenery, socialise in the well-designed outdoor living space or seek refuge by the pool.

### Other Design Options

At Eco Essence Homes we understand that you may want to tailor your home to suit your needs with optional Eco Essence Homes extras or custom design requirements.

### Build with Comfort

Discover how enjoyable your design and building experience can be with Eco Essence Homes. Contact us today to book in for your free design and build consultation.
