

DISCOVER THE BREEZE

Ahhh... feel connected to the elements with The Breeze. Upon entrance you follow a timber verandah that passes by admire the lush landscaping that borders the glimmers of the pool water's surface, then you are seamlessly welcomes to the main living space. This three-bedroom home centralises its main attraction around the life of the pool and main living area while perfectly capturing the warmth and beauty of the Northern sun. Consideration to adopt an open plan layout allows for a breathable space that is open to all the elements, inviting soft natural light and fresh coastal breezes into the home, and minimising the need for artificial technologies. The kitchen overlooks the entire living space and pool creating the perfect environment for a busy and growing family. This space further extends out to an undercover concrete deck for outdoor entertainment. There is an additional space that can be fitted as a rumpus room or fourth bedroom to suit the ever-changing lifestyle of the occupants. The Breeze is constructively designed with high-pitched gable ceilings with strategically place louvers for ultimate air circulation and ventilation. At the front exterior of the home are a set of barn style garage doors and a timber pergola creating a striking feature that align with the rustic style of our Eco-Essence elements range. Not only is The Breeze appealing to the eye, but this home is also one that breaths with the elements provided by mother nature and provides a functional, thriving environment for its occupants.

Other Design Options
