

## DISCOVER THE BUNDEENA

The Bundeena is a double storey custom design home heavily inspired by the Breath range. The external makeup of The Bundeena welcomes you by showcasing a timber arbour entrance way and a solid feature rock wall, a beautiful balance of natural materials with light modern rendering. The media room has complete access to the front patio through a span of sliding doors where streaks of natural sunlight perch through the glass. The kitchen boasts an extremely functional layout and is giving in size. The open-plan living concept of the dining and living areas make for the ultimate entertainment hub, with sliding doors that extend to the alfresco and provide expanse views across the pool and lush landscaping. The situation on the upper floor was designed with the intention to create a space to retreat and unwind from the main living area. The floor includes four spacious bedrooms and an open sitting area with elevated Western and Northern views across the pool. The Bundeena is the ideal family home that is all about connecting the ambiance of inside to outside with careful consideration of functionality, sustainability and feng shui.

### Other Design Options
