

## DISCOVER THE SOLARE

The Solare is the ideal home for a growing family with separate living quarters. On the lower floor, a set of parallel sliding door expand across the front and back of the living and kitchen space, designed to create a naturally breathable environment with seamless access to the outside timber patio and future pool area. Seeded polished concrete flooring has been poured across the entire lower level, not only an aesthetic touch but also a sustainable solution to natural heating and cooling technology through the process of thermal mass. The divider between the living and laundry creates screen to separate the spaces without disrupting natural air flow. The presence of the timber divider and kitchen cabinetry further ground the modern applications within The Solare. There are four bedrooms downstairs situated in an 'L' shape beside one another. The master bedroom overlooks the yard and has an ensuite and walk in wardrobe. Additionally, there is external access to the second floor self-contained studio and a private balcony with elevated Northern views. The Solare creates the perfect environment to satisfy family life while maintaining two spacious independent living situations.

### Other Design Options
