

## DISCOVER THE SOUL

A fusion of functionality and sustainability, The Soul is designed in mind to accommodate the natural progression of a family lifestyle. You are welcomed by dramatic hardwood timber arbors and a gravel driveway that directs you to the entry porch. The striking angled roof-lines are positioned for appropriate sun exposure into the home and allow heat ventilation. The north facing roof carefully positioned to capture solar cells that contribute to reducing overall energy consumption. Tiles are a sustainable flooring option that has been applied throughout the home, and the luxury of carpeted bedrooms separate the spaces. The soul features three well-sized bedrooms, an office and a double garage. This design incorporates thoughtful window mapping to invite an abundance of natural lighting and ergonomic breezes throughout the home. The open-mapped living, dining and kitchen space connects to the exterior alfresco accentuating the living space, making for the perfect entertaining area to enjoy the presence of family and friends. The seamless design of the home provides a smooth transition from inside to out, and the open-map creates a common living space for the entire family to enjoy together.

### Other Design Options
